**Backend Coder**

## THE PROBLEM

---

**Coordinating data collection between field & academy staff**

**Slow manual recruitment process**

**Lack of proper authentication system** to access the registration form data

**Tracking the on-boarding process**  
(registration, training & activation )

## THE SOLUTION

---

**Real time application** that both field & academy staff can use for data collections and processing

**Automation** of the on boarding process

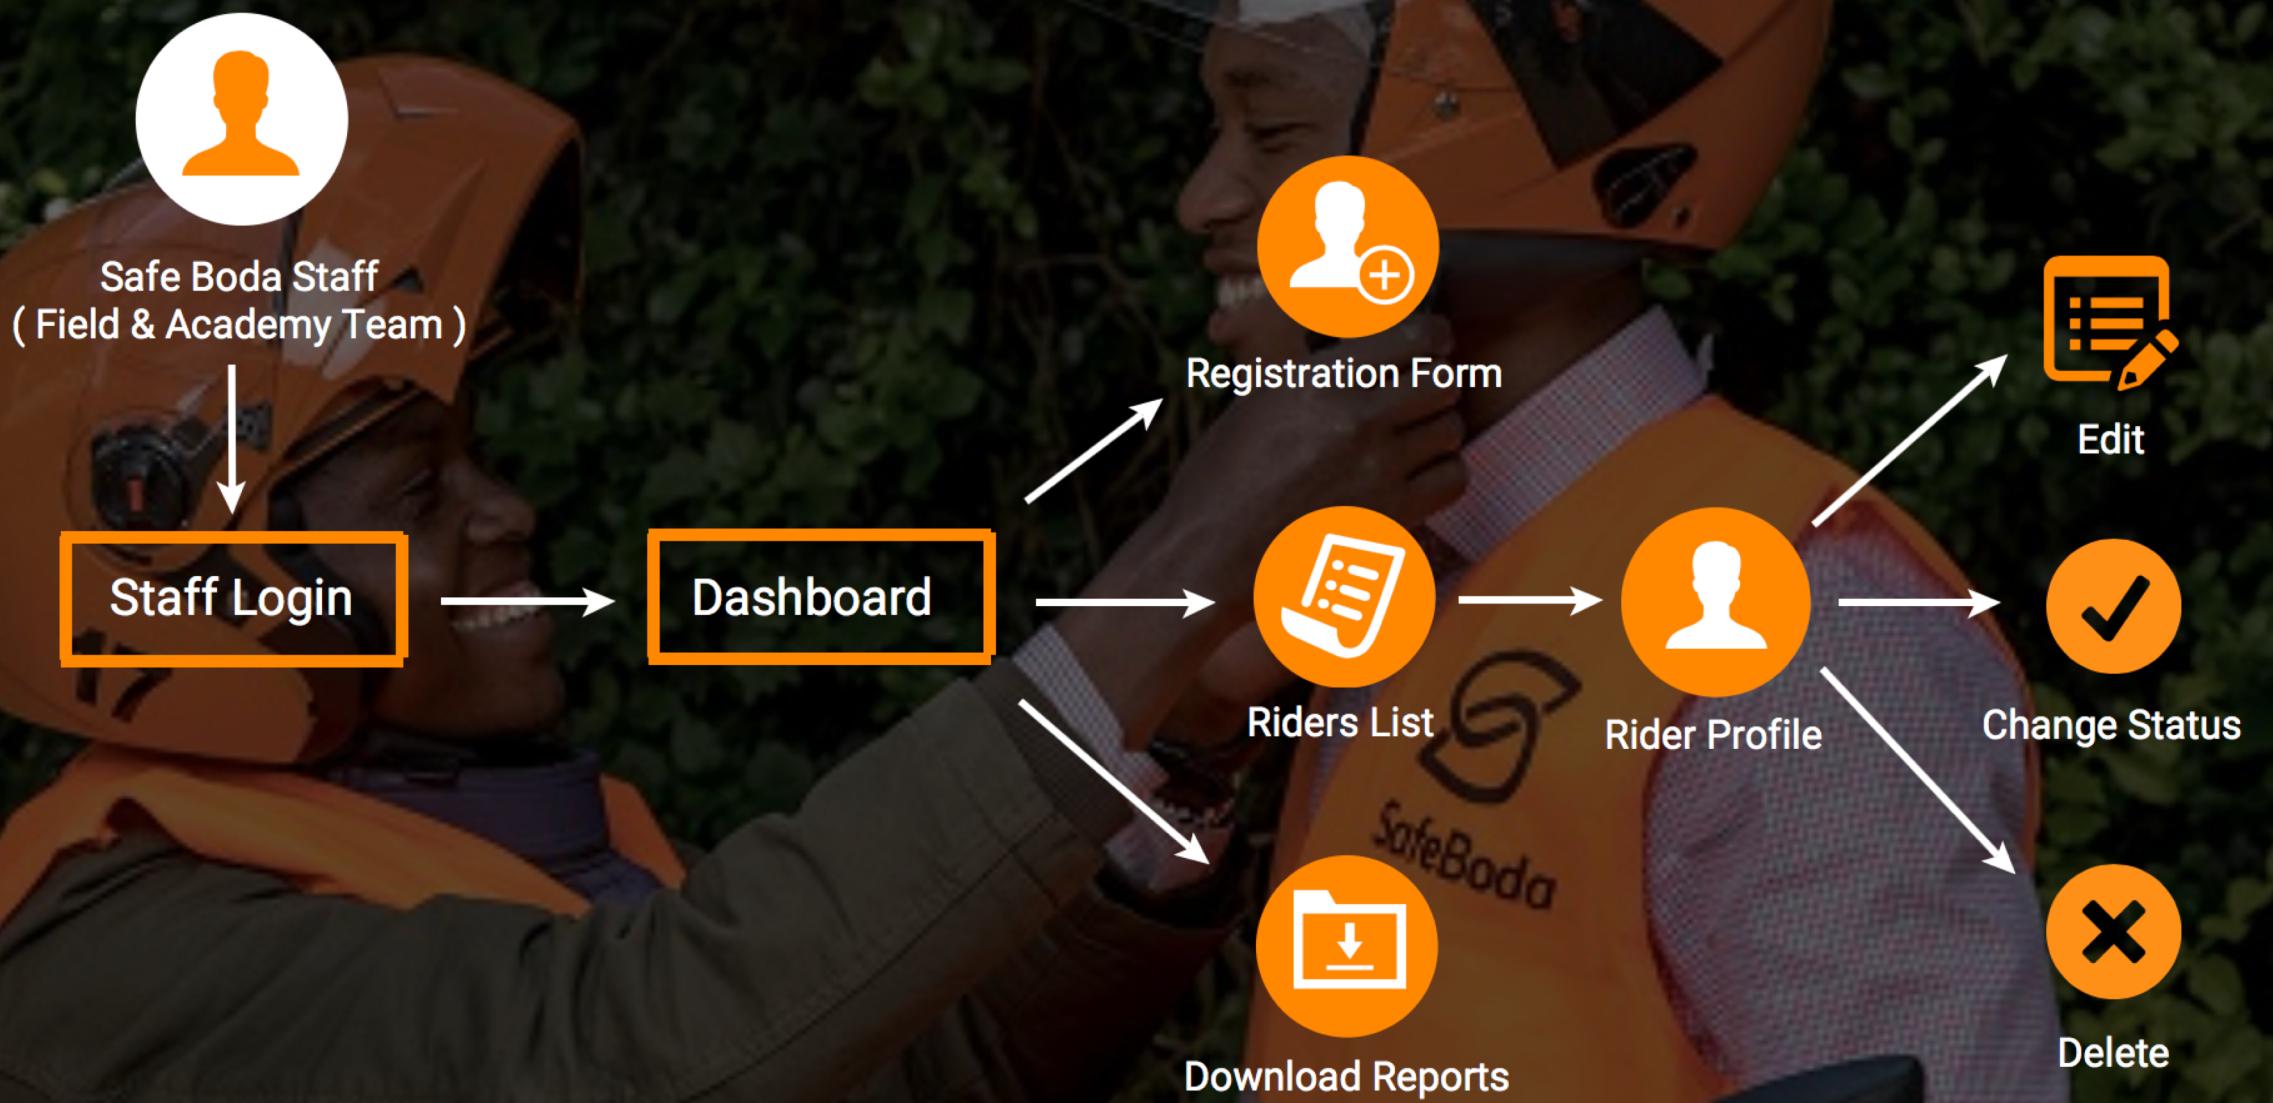

**Log in feature** which gives the different users rights to access the application

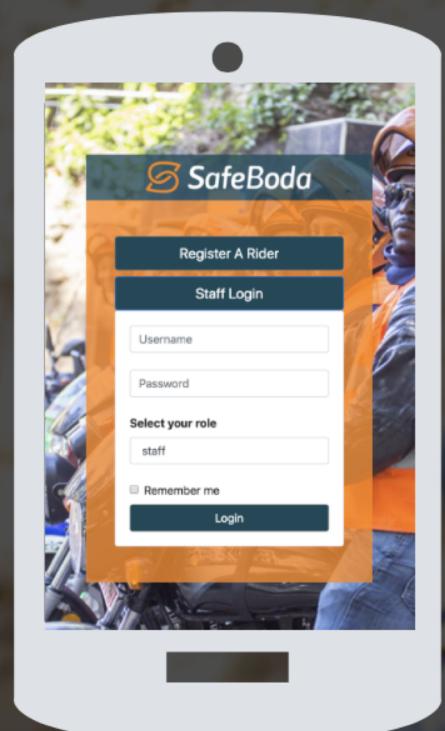

**Dashboard** with data visualisation and reports

# SYSTEM FLOW & FEATURES

# USER INTERFACE DESIGN

A white tablet device shows the 'Riders List Overview' screen from the SafeBoda app. The title bar includes the 'SafeBoda' logo, a 'Register a Rider' button, and a 'Dashboard' button. The main content is a table titled 'Riders List Overview' with columns: Registered, Riders name, Registration date, Status, and Rider details. The table lists six riders with their details: 1. Ricky Rafa Thomson (Registration date: 19/05/2020, Status: registered) 2. Saka Phillip (Registration date: 06/12/2019, Status: Active) 3. Twine George (Registration date: 20/5/2018, Status: Active) 4. kato Greg (Registration date: 1/03/2020, Status: training) 5. Kyanja Paul (Registration date: 06/12/2019, Status: Traning) 6. Mwebe Peter (Registration date: 20/5/2018, Status: Active). Each row has a 'View Profile' button.

- Responsive Interface
- User Friendly
- Safeboda Branding
- Clean & Simple Layout
